

Recently TACC were delighted to attend the launch of the Scotland National Cerebral Palsy Football Team "Player Pathway" that TACC have helped to fund. Greig Taylor (head coach) along with the current Scotland CP Team are inspiring the next generation of Scotland Stars and today their journey began.

23 kids this opening session, the training sessions will run monthly alongside the National Team and TACC are delighted to be involved in such an amazing project.

Not only are all these kids proving that anything is possible but it's also providing a brilliant support network for their parents too.

Huge well done to Greig and his team for all their hard work, we are so excited to be involved and cannot wait to see these youngsters live the dream.
